I love this game, It really brings back memories of me playing Factory 1.3 on MacOS 9 since my Middle School Years in Philadelphia, PA.. Lots of fun for a specific kind of person. Puzzles are suitably frantic and difficult until you crack them, and KC Green's art and influence comes across strongly in the framing story.. A fun and surprisingly frantic "action puzzle" game. The tasks can be deceptively straightforward, but the challenge quickly ramps up at higher conveyor belt speeds. Clever writing and quirky cinematics also add a lot to the experience. Worth a look!. Fun game with a really cool graphics style. Definitely worth it.
